### Advantages For banks

we connect yourself or your corporates to your MA-CUG with minimum effort

### For corporates

we help you not only through the techpart step by step but also with the paperwork - take advantage of the global network and the standards

### For SEPA

we support not only the XML standards but process all other common formats EDIFACT, IDOC, FIN, many different domestic

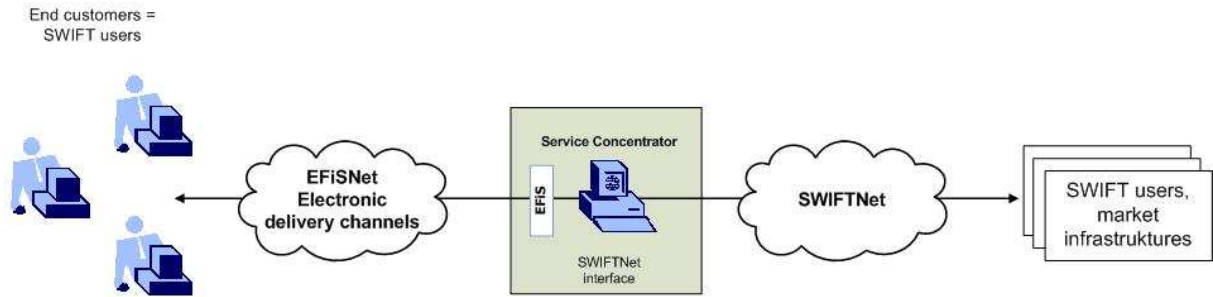

The new service offer by EFiS called **Service Concentrator** delivers SWIFT connectivity the fast way.

A core value of EFiS is to connect through SWIFT the worldwide financial community. We offer an easy and simple way to use all the advantages of the global SWIFT network.

We aim at all financial institutions and corporates. We want to help the smaller financial institutions to get the SWIFT advantages without the hurdles. We also want to help the bigger ones to connect their corporates to their MA-CUG or even to SCORE.

*The market demand for the SWIFT connectivity option is driven by:*

- the introduction of TARGET2 in 2007, to which participate a number of small institutions not yet connected to SWIFT
- members who service smaller institutions with SWIFT-based international payment services
- investment managers that want to use SWIFT and outsource their operations
- SWIFT-members providing connectivity for corporates in Member Administered Closed User Groups (MA-CUGs)

Member/Concentrator connectivity model

The Service Concentrator offers unique business services, namely:

- Assisting the end customer in applying to become a SWIFT user
- Ordering SWIFT products and services on behalf of the end customer
- Helping with basic service requests – we are the first contact for all your problems. Hotline. We share our SWIFT know how & consultation. This connectivity offer is a total white label shared service.
- Using an existing communication channel to link the end customer to the world of SWIFT

## Supported Features

SWIFTNet FileAct  
 SWIFTNet InterAct  
 SWIFTNet Browse  
 SWIFTNet Accord  
 SWIFTNet FIN

Thus it is the starting point for all new SWIFT solutions.

End customers join in their own name in an existing infrastructure with the normal admission procedure. End customers obtain BIC8 or BEI8 addressing on SWIFT and take responsibility for their messages. End customers who are member buy shares according to normal procedures.

This connectivity offer is a total white label shared service.

## The Service Concentrator model

facilitates the usage of SWIFT since it is the service bureau that takes care of the SWIFT administration, the connection to SWIFTNet and the transformation of transactions into SWIFT messages on behalf of end customers. This new model therefore reduces total cost of ownership for these smaller target users.

In addition to the plain connectivity we offer additional optional services (AOS) with software solutions by other partners. ABK Systeme- the payment solution specialists - delivers a complete payment platform for domestic, SEPA und international payments, and solution for securities and FX / MM are also available.
